

Global Capabilities

We have expanded our global footprint with the addition of Singapore and China, which along with Switzerland completes our international network of labs outside of the US. In just under two decades we have built a reputation for credibility and reliability; serving the needs of the oncology, pathology, and pharmaceutical community with newly expanded services to support a global wetlab footprint.

Our test menu features over 650 tests including IHC, FISH, Flow Cytometry, Molecular, Next-Generation Sequencing, Cytogenetics, and our proprietary Multiplexed Immunofluorescence technology. The breadth of our menu, coupled with the power of our consultative services provides our customers with unparalleled insight into the nature of cancer and allows our customers to expand their development journey from assay development through commercialization. Having participated in hundreds of immunotherapy and other biomarker development trials, NeoGenomics plays a vital role in improving patient care and advancing precision medicine.

Lab Services We Offer

Anatomic Pathology

CDx & IVD

Flow Cytometry

Data Services

FISH

Genomics

Immunoassays

Multiplexed Immunofluorescence

The Global Oncology Community's Assay Development Partner from Biomarker Discovery to Commercialization

- Proprietary MultiOmyx technology — evaluation of up to 60 biomarkers in a single slide
- Test modality offerings continue to be expanded across all our international sites. Ability to develop assays at specific sites and transfer to other sites
- Largest global provider of PD-L1 IHC testing
- Global SOPs across all locations provide greater continuity and QA
- Proven commercialization record
- Agility in project customization

Global Value Proposition

- Poised to support you — from planning through execution
- Guaranteed one business day response on project inquiries
- Customized delivery of project data that meets your specific reporting requirements
- Proactive project management with a clear line of responsibility mitigates risks

Global Consultation

We are proud of the collective knowledge shared amongst our scientific team. With this, we are able to support the expansive range of oncology expertise needed within the industry. Consultation across the continuum of development from pre-clinical research and development through CDx commercialization is a core NeoGenomics strength.
