

NEW Gyrolab® Biomarker Kit Reagents

Announcing NEW Gyrolab Human Cytokine Kit Reagents!

Fast, automated assays | Robust and reproducible
High sensitivity | Wide dynamic range

Kit Reagents contain reagents,
standard, and buffers for 1 CD*

Gyrolab Human Cytokine Kit Reagents are for the quantification of five of the most common biomarkers of inflammation; TNF-alpha, IFN-gamma, IL-6, IL-10 and IL-4. Kit Reagents are run on the Gyrolab platform in a single analyte format.

Prepare samples, load into the Gyrolab platform, start the run, come back in 90 minutes for data. Maximize your laboratory workflows!

Kit Reagents have been optimized for use with the Gyrolab Bioaffy™ 4000 CD but **can be used with other Gyrolab CD types, providing flexibility and customization. Gyrolab Bioaffy CD, PCR plates, Microplate Foils, and Wash Buffer pH 11 are ordered separately.*

ORDERING INFORMATION

Product Number	Product Name
P0020821	Gyrolab Human IL-10 Kit Reagents
P0020822	Gyrolab Human IL-4 Kit Reagents
P0020823	Gyrolab Human IL-6 Kit Reagents
P0020824	Gyrolab Human IFN- gamma Kit Reagents
P0020825	Gyrolab Human TNF- alpha Kit Reagents

Accessories For Use With Kit Reagents	
P0020705	Gyrolab Bioaffy 4000 CD 4000 nL, 96 datapoints
P0020822	Gyrolab Accessories Bundle 96-well skirted PCR plates (x3), Microplate Foils (x3), Gyrolab Wash Buffer pH 11(x1)

*Gyrolab software is designed for
21 CFR Part 11 compliance.*
