

Histology & Immunohistochemistry Services

Champions Oncology's histology and immunohistochemistry services are custom developed and fully optimized to meet your needs in preclinical research. Champions Oncology leads the industry in pathology expertise and innovative automated technology that provides you with the highest quality endpoints complimentary to in vivo and ex vivo study results. We complete the tissue collection from one of our highly characterized tumor bank models, tissue processing, paraffin embedding, cutting and staining all in-house. Our Champions Oncology Quality Control process ensures unparalleled results on each slide, every time.
