

High quality safety testing with quick turnaround time and 365 day availability

MLM Medical Labs is a leading global specialty and central laboratory offering a comprehensive range of services and clinical trial testing capabilities in Europe and the United States.

All safety analytics are conducted according to ISO15189 and CLIA regulations to guarantee high quality data at any time. Our extensive safety testing portfolio includes **hematology, clinical chemistry, urinalysis**, but also e.g. **cytokines, cardiac markers** and **serology parameters**.

2000+

Analysis of safety samples per week

365

Days analytical service

Our safety labs in Germany and the US conduct safety analysis with the same analytical platforms (cobas® 6000 and u411 (Roche), XN-1000 (Sysmex)) according to standardized SOPs:

- ✓ harmonized methods
- ✓ harmonized reference ranges
- ✓ identical quality management systems
- ✓ harmonized analytical reports
- ✓ **100% comparability of data**
