

SUSTAINABILITY SERIES

Conference Schedule 2023

SUSTAINABLE CHEMISTRY 2023

In-Person Congress
& Exhibition

2-Day
Event

- 100+ attendees & 20+ presentations
- An innovative two-day meeting exploring Sustainable Chemistry, aiming to innovate processes to improve product performance whilst delivering environmental benefits
- From breakthrough technologies to the latest strategies, the event will bring together leading companies for two days of discussion, knowledge-sharing and focused networking
- Co-located with Peptides and Oligo Chemistry UK Congresses

30 - 31 March 2023 | London, UK

SUSTAINABILITY IN PHARMA & HEALTHCARE 2023

In-Person Congress
& Exhibition

2-Day
Event

- 150+ attendees & 25+ presentations
- An informative two-day meeting to accelerate the transition to sustainable healthcare in UK & Europe
- Case studies featuring environmental sustainability, global supply chain procurement, sustainable medicines
- A showcase of innovative technologies and solutions in clean med technology, sustainability in Data/AI, manufacturing and optimising procurement & supply chain
- From technologies to solutions in pharma and healthcare sustainability, our congress will bring together leading pharma and healthcare organisations for discussions, knowledge-sharing and focused networking
- Co-located with Pharma Data Congress

Sustainable Chemistry 2023

30 - 31 March 2023 | London, UK

- **2-Day Event**
- **In-Person Congress & Exhibition**

Sustainable Chemistry UK: In-Person addresses an important and expanding field which provides new understanding in Green Chemistry and innovative approaches to sustainable drug development and process. The two-day event presents insightful case studies in Innovation and technological advances in driving down pharma sector emissions by implementing “green-by-design” in early drug development phase pipeline projects, aiming to treat diseases and waste reduction.

DAY ONE

Green Chemistry For A Sustainable World

- Achieving sustainable chemistry
- Driving sustainable innovation across the pharmaceutical product life cycle and value chain
- Safe and sustainable chemical synthesis
- Minimizing hazards and risks in chemical process development: tools, applications and potential for impact

DAY TWO

Green & Sustainable Drug Development & Processes

- Sustainable chemistry, focussing on drug development and processes
- Case studies in innovation and technological advances in driving down sector emissions
- Benchmarking on improve product performance whilst delivering environmental benefits
- Its “green-by-design” in early drug development phase pipeline projects, aiming to treat diseases and waste reduction

Who Will Be There?

100+ VPs, Directors & Senior Managers from leading pharma & biotech companies and research institutions in the following fields and more:

- Organic Chemistry
- Oligo Chemistry
- Peptides Chemistry
- Chemical Synthesis
- Chemical Process Development
- Product Life Cycle
- Environmental Sustainability
- Medicinal Chemistry

Formal and informal meeting opportunities offer delegates the chance to discuss key solutions with leading service providers:

- Renewable Technology & Solutions
- Clean Med Technologies
- Environmental Sustainability Consultants
- Chemical Process Development: Tools & Applications
- Chemical Waste Treatment Solutions

Previous Oxford Global Speakers on Sustainability:

Fiona Adshead
Sustainable
Healthcare
Coalition

Veronique Toully
UCB

Jason Snape
AstraZeneca

Ian Milimo
UNDP

Nick Martin
Great Ormond
Street Hospital

Sustainability in Pharma and Healthcare 2023

September 2023 | London, UK

- **2-Day Event**
- **In-Person Congress & Exhibition**

Join and network with over 300 industry leaders, innovative speakers and participants to share ideas and best practice, co-create solutions, and empower individuals and teams to accelerate the transition to sustainable healthcare in UK and Europe. Learn about key focus areas including achieving and benchmarking environmental sustainability, developing “Greener” pharmaceuticals, as well as Clinical Trials and Patient Access by improving accessibility of clinical trials and development. Do not miss out on learning about ways stakeholders can optimise supply chain and procurement and incentivise partners to create a sustainable supply value chain.

DAY ONE

Sustainability In Pharma

- What are the barriers to achieving carbon zero in the pharmaceutical industry and healthcare sectors?
- Working towards a responsible model of consumption and production in a carbon neutral environment
- Best practices in achieving sustainability by monitoring environmental performance, whilst minimising emissions and exposure to chemical substances
- Optimise supply chain and procurement and incentivise partners to create a sustainable supply value chain
- COP 28 Meeting – What Would Be The Role Of The Pharma And Healthcare Institutions And What Can These Parties And Stakeholders Do In Addressing Challenges In The Adoption Of Carbon Net Zero

DAY TWO

Sustainability In Healthcare

- Sustainability in drug development: developing “Greener” pharmaceuticals & definition of greener pharmaceuticals and APIs and general minerals
- Sustainability in Clinical Trials and Patient Access: improving accessibility of clinical trials and development, including diversity in clinical trials, ethnicity, GHG clinical trials
- Delivering patient care and building sustainability practices into the development of new drug delivery systems/devices and implications on precision medicine and reduction of waste
- Delivering patient outcomes and precision medicine
- Partnership practices-working with patients and implications on digital health as well as disease prevention strategies and intervention practices

Who Will Be There?

150+ VPs, Directors & Senior Managers from leading pharma & biotech companies and research institutions in the following fields and more:

- Environmental Sustainability
- Supply Chain
- Health/Safety
- Operations
- Procurement
- Patient Access
- Patient Care
- Procurement
- Plant/Global Engineering

Formal and informal meeting opportunities offer delegates the chance to discuss key solutions with leading service providers:

- Sustainability In Manufacturing & Procurement & Supply Chain Solutions
- Sustainability In Data/AI Technology & Infrastructure
- Sustainability Consultants
- Clean Med Technology
- Renewal Environmental Solutions

Previous years delegates in numbers:
